

# Rohitha Ponnappalli

Java Full-Stack Developer | Spring Boot | React.js | AWS

+91 7989403073 | Hyderabad, India | [rohithaponnappalli25@gmail.com](mailto:rohithaponnappalli25@gmail.com) | [LinkedIn](#) | [Github](#)

## PROFESSIONAL SUMMARY

Results-driven **Java Full-Stack Developer** with hands-on experience designing and developing scalable RESTful APIs and full-stack web applications using Java, Spring Boot, and React.js. Skilled in building secure backend services with JWT authentication, designing relational databases using MySQL and PostgreSQL, and integrating frontend applications with backend APIs. Experienced in deploying applications on AWS (EC2, S3, Elastic Beanstalk) and working with containerized development workflows. Passionate about delivering efficient, scalable, and user-focused software solutions.

## SKILLS

|                            |                                                                                 |
|----------------------------|---------------------------------------------------------------------------------|
| <b>Programming:</b>        | Java, Python, JavaScript (ES6+)                                                 |
| <b>Backend &amp; APIs:</b> | Spring Boot, Spring MVC, JPA/Hibernate, RESTful APIs, FastAPI, Swagger, Postman |
| <b>Frontend:</b>           | React.js, HTML5, CSS3, Axios                                                    |
| <b>Databases:</b>          | MySQL, PostgreSQL                                                               |
| <b>Cloud &amp; Tools:</b>  | AWS (EC2, S3, Elastic Beanstalk), Docker (basics), Git, VS Code                 |
| <b>Concepts:</b>           | OOPs, Microservices Architecture, SDLC, JWT Authentication                      |

## PROFESSIONAL EXPERIENCE

### Developer I - Software Engineering (Training) | UST, Trivandrum

Mar 2025 - Jul 2025

- Completed a 5-month full-stack development training focused on **Java, Spring Boot, React.js, SQL, and RESTful APIs**.
- Co-designed and developed **QuickConnect**, a full-stack home services platform supporting user registration, service booking, payments, and provider workflows.
- Built responsive user interfaces using React.js and integrated backend services through RESTful APIs using Axios.
- Designed and optimized SQL queries to improve data retrieval efficiency and overall application performance.
- Deployed applications on **AWS Elastic Beanstalk** and gained hands-on exposure to **Docker-based containerization** and cloud deployment workflows.

## PROJECTS

### The Bookshelf — Book Management Application

Dec 2025 - Jan 2026

- Built a high-performance backend API using FastAPI to manage books and authors with full CRUD functionality.
- Designed structured and well-documented REST endpoints following OpenAPI standards (Swagger UI).
- Implemented data validation and schema enforcement using Pydantic for reliable API responses.
- Integrated MySQL database for persistent storage and efficient data management.
- Explored integration of AI APIs to enhance application functionality, focusing on intelligent response handling and workflow automation.

### Task Management Application

May 2025

- Developed a full-stack task management system to track and manage user tasks with status-based workflows.
- Designed RESTful APIs using Spring Boot to support task creation, updates, and status tracking.
- Integrated React frontend with backend services using Axios for seamless user interaction.
- Modeled relational database schema in MySQL to efficiently store tasks, users, and status information.
- Deployed the application on AWS Elastic Beanstalk during which I also explored AWS S3 and EC2 services, enabling cloud-based access and testing.

### QuickConnect — Home Services Application

Apr 2025 - Jun 2025

- Designed and developed a full-stack service booking platform enabling users to discover services, schedule bookings, and interact with service providers.
- Implemented secure authentication and authorization mechanisms (JWT-based) to manage user and provider access.
- Built scalable RESTful APIs handling multiple entities including users, providers, services, bookings, reviews, and payments using Spring Boot and JPA.
- Optimized database queries and relationships in MySQL to ensure efficient data retrieval and performance.
- Integrated OTP-based booking verification to enhance trust and security between users and providers.

## EDUCATION

### Jawaharlal Nehru Technological University, Hyderabad

Bachelor of Technology in CSE (Data Science)

Dec 2020 - May 2024

CGPA: 8.38

## CERTIFICATIONS

### AWS Cloud Practitioner Essentials — AWS

Mar 2026 - May 2026
