PROFESSIONAL SUMMARY

Full-Stack Developer skilled in building scalable web applications and APIs using Java, Spring Boot, and React.js, with hands-on experience in secure application development, JWT and OAuth 2.0 authentication, role-based authorization, and AI-integrated systems. Experienced in RAG pipelines, agentic AI workflows, and AWS cloud deployment, with knowledge of Okta IAM, authentication and token security, and identity automation using Okta Workflows.

PROFESSIONAL EXPERIENCE

Developer I - Software Engineering | UST, Trivandrum **Mar 2025 - Jul 2025**

- Completed a 5-month full-stack engineering training focused on **Java, Spring Boot, React.js, SQL, RESTful APIs, and Cloud deployment**.
- Co-designed and developed QuickConnect, a full-stack home services platform supporting authentication, service discovery, booking, payments, reviews, and provider workflows.
- Built React.js interfaces, integrated Spring Boot REST APIs using Axios, with relational database design and SQL-based data management, and deployed applications on AWS Elastic Beanstalk using Docker.

PROJECTS

A.E.G.I.S. — AI Enterprise Governance & Identity Security **Aug 2026 - Sep 2026**

- Built and deployed a multi-agent governance platform using **Spring Boot, Spring Security, Spring AI, React.js, Auth0, and PostgreSQL**, implementing **OAuth 2.0/OIDC, JWT-based authorization, RBAC, least-privilege access**.
- Developed Oracle and Shadow agents using RAG and semantic search for enterprise document retrieval and audit analysis, using **Apache Tika, embeddings, and Google Gemini**.
- Implemented Titan agent's **PAM (Privileged Access Management)/JIT (Just-in-Time)** workflow for controlled privileged operations, including approval, time-limited access, and simulated execution.

Project P — AI-Assisted Privileged Access Monitoring **Oct 2026**

- Integrated the **Okta System Log API with Python** to retrieve **identity and authentication** events from an Okta development environment.
- Developed a **FastAPI backend and rule-based monitoring** engine to identify and prioritize failed authentication, privilege change, and API token creation events.
- Built a **LangGraph investigation workflow using Google Gemini** to generate evidence-based assessments and suggestions for human review.

Seek AI — Document Query Application **Jul 2026**

- Built a secure full-stack **RAG (Retrieval-Augmented Generation)** document-query application using **Spring Boot, Spring AI, React, and TypeScript**, implementing **JWT authentication** and user-specific document upload and access.
- Implemented a document ingestion pipeline with **Apache Tika**, token-based chunking, **Google Gemini** embeddings, similarity search, and context-grounded responses.

QuickConnect — Home Services Application **Apr 2025 - May 2026**

- Engineered a full-stack home services platform using **Spring Boot, Spring Security, React.js, and MySQL**, supporting service discovery, bookings, payments, reviews, and provider management.
- Implemented **JWT authentication, role-based authorization, OTP verification**, and 10+ RESTful APIs across 6 relational entities.

SKILLS

Programming:	Python, Java, TypeScript, JavaScript
Frameworks & APIs:	Spring Boot, Spring Security, React.js, FastAPI, JPA/Hibernate, RESTful APIs
AI & Agentic Systems:	RAG, LangChain, LangGraph, Spring AI, Google Gemini
Security & IAM:	Okta, OAuth 2.0, OIDC, JWT, MFA, RBAC, PAM/JIT
Databases:	MySQL, PostgreSQL, MongoDB
Cloud & Tools:	AWS (EC2, S3, Elastic Beanstalk), Docker, Git

EDUCATION

Jawaharlal Nehru Technological University, Hyderabad **Dec 2020 - May 2024**
Bachelor of Technology in CSE (Data Science) **CGPA: 8.38**

CERTIFICATIONS

Oracle Agentic AI Certified Foundations Associate — Oracle **Aug 2026**
AWS Cloud Practitioner Essentials — AWS **May 2026**
